

## **SOLAR TECHNOLOGY, INC. ANNOUNCES DOMESTIC FIVE-YEAR WARRANTY**

### **COMPREHENSIVE PROTECTION PROGRAM (CPP)**

April 9, 2009 - Allentown, PA.....Solar Technology, Inc. has announced a new Comprehensive Protection Program (CPP) which provides for five-year limited warranties protecting all Silent Messenger variable message signs (message boards), Silent Sentinel advanced warning arrow panels (arrow boards) and Silent Advisor radar speed trailers (radar speed displays) purchased for U.S. domestic use on or after April 1, 2009.

This new Comprehensive Protection Program reflects Solar Technology's commitment to engineering, designing and producing the industry's highest quality, and most reliable, traffic safety products.

SolarTech's Comprehensive Protection Program (CCP) will enable customers to better predict maintenance costs of their rental fleet products for the first five years of service, and add significant value when selling SolarTech message boards, arrow boards and radar speed trailers to end users.

These limited warranties are "bumper to bumper" and cover repair or replacement of all components, on an exchange basis, with the exception of vendor items and consumables, including, but not limited to modems, radar guns, tires, batteries and battery chargers. These components are covered individually by their respective original equipment manufacturers, and may carry similar warranties. Other exclusions include physical damage and normal "wear and tear" arising from typical utilization.

SolarTech is able to provide this level of protection because it maintains 100% control over the design, manufacture and repair of all mechanical, electrical and electronic assemblies, and subassemblies. All engineering, manufacturing and component repair operations are executed in-house, in Allentown. This unique level of control gives Solar Tech the confidence to provide an unparalleled level of protection for its customers.

"Our new Comprehensive Protection Program constantly reminds us that we need to remain on the leading edge of quality design and manufacturing," said Eric Zerphy, COO and owner of Solar Technology, Inc. "This firm commitment to our product quality, and the value we offer to our customers, impresses upon every employee on a daily basis that we must continue to strive for excellence in all phases of our engineering, sourcing and manufacturing processes."

Additionally, Solar Technology, Inc. will continue to offer a ten-year limited warranty on all LED lamps used in its Silent Sentinel line of advanced warning arrow panels. Please contact Solar Technology, Inc. for complete warranty details.

Solar Technology, Inc. is a U.S. owned ISO 9001 registered company.
